### ***RESTRICTION REQUIREMENT***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I. Claims 1-19**, drawn to a storage device, classified in Class 220.

**Group II. Claims 20**, drawn to method of using a storage device, classified in Class 53.

The inventions are distinct, each from the other, because of the following reasons:

The inventions of Groups I and II are related as **product and process of using the product**. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process of using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case the inner compartments of the storage device set forth in the claims of Group I can be filled without being removed from the storage device as set forth in the claim of Group II. The inner compartments could also be removed and inserted or not inserted back into the storage device of Group I.

Because these inventions are distinct for the reasons given above, and because they have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes, as indicated, is proper.

Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even if the restriction requirement is traversed.

Applicant is reminded that, upon cancellation of claims to a non-elected invention, the **inventorship must be amended** in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition

Art Unit: 3721

under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h). Applicant should further **amend the title**, in necessary, to reflect the elected invention.
